

# AI+ CLEAR<sup>®</sup> DRY

**SMARTER LITTER MANAGEMENT  
FOR BETTER FLOCK PERFORMANCE**

When litter conditions are less than ideal, **AI+Clear<sup>®</sup> Dry** delivers the tools you need to regain control. Whether it's **short out times, long grow-outs, water management problems, or wet seasonal conditions**, this product binds water, **lowers ammonia levels**, and creates a drier, healthier environment for your birds.

Developed in 1997 as the original **AI+Clear<sup>®</sup> formulation**, this product remains an industry standard for **improving bird health, enhancing performance, and controlling house conditions.**

## **WHY GROWERS CHOOSE AI+CLEAR<sup>®</sup> DRY**

- **CONTROLS AMMONIA NATURALLY:** Converts ammonia into ammonium using a buffered acid reaction, helping you keep ammonia at safe, recommended levels.
- **BINDS EXCESS MOISTURE:** Each 100 lbs. binds around **12 lbs. of water**, reducing litter wetness and improving house conditions.
- **ENVIRONMENTALLY FRIENDLY:** Binds phosphorus to make land application safer and qualifies for **EQIP standards** for air and water quality.
- **NO SODIUM ADDED:** Unlike sodium-based products, AI+Clear<sup>®</sup> Dry is ideal for farms that spread litter on pastures.

**SMARTER LITTER MANAGEMENT  
FOR BETTER FLOCK PERFORMANCE**

## **EASY & FLEXIBLE APPLICATION**

Apply it yourself or let a **custom applicator** handle the work. AI+Clear<sup>®</sup> is **readily available nationwide** through farm stores, cooperatives, animal health distributors, and our applicator network.

## **HOW TO GET THE BEST RESULTS**

- Apply **3–5 days before placement** (or 5–7 if conditions are extremely dry).
- Product can be applied with **equipment up or down**, whatever is most convenient for the grower
- **Ventilate properly** after application and during preheat to control ammonia release.
- Increase application by **25 lbs./1,000 ft<sup>2</sup>** if windrowing or managing high-challenge conditions.
- AI Clear<sup>®</sup> is safe for application with birds present and great for drying floors mid flock.

## **WHAT YOU CAN EXPECT**

- 1 BETTER WEIGHT GAIN & FEED CONVERSION**
- 2 IMPROVED PAW HEALTH**
- 3 LOWER MORTALITY RATES**
- 4 HEALTHIER, DRIER LITTER**
